

# SUCCESSFUL COLLABORATION REQUIRES SKILLSETS AND KNOWLEDGE FROM A VARIETY OF DISCIPLINES

- Identify the Type of Collaboration for your goals (there are many different, valid collaboration models)

- Identify Key Players

- Design a clear and well-defined process for managing the collaboration

- Foster good relationships throughout – consider differences in perspectives, cultures, goals. Allow for failures.

- Don't underestimate the support and resources needed (time, funding, and skillsets)

- Be patient! Successful collaboration takes time.

## ARCUS INSTITUTIONAL MEMBERS

The Arctic Research Consortium of the U.S. (ARCUS) is an established 501(c)(3) not-for-profit membership community interested in sharing knowledge and responding collaboratively to Arctic change. For over three decades, ARCUS has played a key service role for those looking to work more collaboratively across institutions, disciplines, knowledge systems, and sectors to address Arctic challenges. ARCUS activities focus on: 1) research community support, 2) interdisciplinary networking, community-building events, and meetings, 3) collaboration with Indigenous communities and knowledge systems, and 4) communications and outreach to share knowledge.
