# Early Sámi Play & Games: Sustainability & Peace

1. Preserving and protecting the environment.
2. Promoting physical activity and good health.
3. Taking risks and accepting unfulfilled triumphs.

John Kilbourne,  
Ph.D  
Grand Valley State  
University  
kilbourj@gvsu.edu.

With climate change expanding trade routes in the Arctic and the resultant pursuit of oil, gas, mineral deposits, and fish, it is imperative that the eight Arctic countries find paths towards sustainability and peace in the region.

Revisiting and understanding the traditional play and games of the indigenous people of these regions can go a long way towards helping those determining the region's future to work cooperatively towards these goals.

Honorable resolutions and solutions that lead to a sustainable and peaceful Arctic.
