Fairbanks, AK 99709

The Arctic Research Consortium of the United States has been connecting Arctic research since 1988.

Our goals of networking, communications, education, and research community support & facilitation are guided by our values to connect Arctic research across the boundaries of organizations, disciplines, geographies, sectors, knowledge systems, and cultures.

*ARCUS is proud to be the creator of
The Arctic in the Classroom and PolarTREC.*

www.polartrec.com*

The Arctic in the Classroom partners scientists, educators, & communities to improve Arctic education across Arctic Alaska. This program strives for:

- community focused research with students & community members collecting data;
- researchers working with the community for sustainable data collection; and
- integrating culturally responsive education & research.

STEM at the Poles! PolarTREC is research experiences for formal and informal educators in the Polar Regions & focuses on:

- professional development for educators to learn more about the Arctic and Antarctica;
- engaging educators in hands-on field research while working side by side with scientists; and
- increasing teacher science content, student knowledge, & public awareness of the Polar Regions.
